__ Professional summary

- Amicable, thoughtful, dedicated developer who is highly adaptable to a variety of work environments
- Experience working with developers, designers, and sales professionals to improve web functionality and UX
- Experience proofreading and editing web content in plain language and with respect to the needs of the client
- Experience providing player support, moderation, and data annotation for clients in the video game industry
- Experience using architectural design software in the creation of floor plans for residential properties
- Very capable in working both independently and collaboratively within a team environment
- Experience implementing various custom front-end/back-end solutions for clients and end users
- Experience using computer vision annotation software to perform precise image annotations
- Experience as a receptionist, performing data entry, and general IT tasks for internal software systems
- Highly competent with a wide range of software, with an exceptional typing speed of 80-100 wpm

__ Development experience

- Developing and enhancing front-end components in HTML, CSS, Sass, JavaScript, jQuery, and React
- Object-oriented programming in PHP and experience working with software design patterns
- Working with various themes and page builders (e.g. Enfold, Elementor), as well as numerous plugins generally
- Working with APIs (e.g. Web APIs, Spreaker API), JSON, and CSV data in various contexts
- Experienced with version control via git in the command line + merge editor (in Visual Studio Code) + GitHub/GitLab
- Working with cPanel, web hosts, and system administrators, as well as some experience with Cloudflare and AWS
- Building stylish, responsive front-end layouts and components from mock-ups designed in Adobe XD
- Developing solutions for numerous WordPress sites of varying size and complexity
- Using and writing shortcodes (e.g. Shortcode API) as well as custom post types
- Collaborating in agile environments (e.g. SCRUM) + experience in an environment using CI/CD pipelines in GitLab
- Regular use of relational databases (MySQL), including experience in database administration (e.g. user role modification, imports, exports)
- Working with Linux servers (e.g. tailing logs, modifying file permissions, search and replace operations, updating SSL certificates, Apache configuration)
